# DCP 488 – Consuming 'De-Energised' Sites

## Legal Text

## Redline against the DCUSA text after DCP440

**Amend paragraphs 139 and 140 of Schedule 16 (CDCM) as follows:**

139 There will be no charges applied to HH MPANs/sites which are correctly identified in MPAS as de-energised. Where a site is incorrectly identified in MPAS as having been de-energised (i.e. when non-zero metering advances are received for a period despite the site being identified as de-energised), then the DNO Party shall contact the supplier to request that the status is corrected. The position which applies in the interim (pending correction of the status in MPAS) is as follows:

(a) f~~F~~or non-MHHS Metering Points~~,~~ (and for MHHS Metering Points for Settlement Periods whilst they are not under MHHS arrangements), ~~if a site is found to~~charges will not be ~~energised, then~~applied in the interim, and once ~~its~~the status has been corrected in MPAS, charges will be back dated to the date of energisation as identified in MPAS~~.~~; or

(b) f~~F~~or MHHS Metering Points (for Settlement Periods whilst they are under MHHS arrangements), charges will be applied~~. Once~~ in the interim, and once the status has been corrected in MPAS, ~~any difference in~~the charges ~~will~~which have been applied shall be ~~back dated~~reconciled against the charges which should have applied to cover the period in which the site was incorrectly identified in MPAS as de-energised.

140 Not used.
