IDNO PARTIES			
ESP Electricity td	Accept	Accept	N/A
UK Power Networks (IDNO)	Accept	Accept	N/A
SUPPLIER PARTIES			
British Gas	Accept	Accept	We are disappointed that this has been raised as an urgent modification. The updating of the CDCM was raised at the April DCMF and an action was taken to raise a modification at the time to address these issues. Further we have discussed raising modifications to address volatility issues during 2010 within workstream C and been advised that it would be too late to raise modifications in time for an April 2011 tariff implementation.
EON UK	Accept	Accept	N/A
Npower Ltd	Accept	Reject	Given that the originally proposed implementation date of 6th December 2010 has now passed, and that the 2011 indicative prices are due to be published in the next few days, we do not believe that it would be appropriate for this change to be rapidly implemented within the next few weeks as proposed given the magnitude of some of the impacts

			<p>upon end users.</p> <p>We therefore propose that a new Implementation Date of 3rd November 2011 should be adopted.</p> <p>Implementation of DCP77 upon this date would ensure that the revised drafting is available in a timely manner for the publication of the April 2012 indicative prices, and will lead to more cost reflective charges as the rate of return used to calculate the tariffs will be aligned with the price control prevailing at that time.</p>
SSE Energy Supply Limited	Accept	Accept	<p>We only accept DCP 077 on the basis that we receive an explanation for the large changes in Generation DUoS prices that result from this CP.</p>
