

DCP 094 Legal Drafting

Schedule 16

Amend paragraph 101 as follows:

101. Data from the RRP are used to distinguish between direct and indirect costs, with direct costs coded by network level. For the purpose of this calculation, capital expenditure referred to as "Load related new connections & reinforcement (net of customer contributions)" is not allocated to any network level. All other direct costs are allocated but negative figures are replaced with zero. ~~is included, (net of customer contributions,) is not allocated~~ but negative figures are replaced with zero. This analysis provides direct costs percentage for each network level, based on RRP data. The direct cost percentage for LV is denoted "[LV direct proportion]" and the direct cost percentage for HV is denoted "[HV direct proportion]".¹

Wragge & Co LLP

¹ Paragraph 101 is also subject to DCP95, which seeks to amend the final sentence of this paragraph (but not the sentences relevant to this change proposal).
