

DCP 160 Draft Legal Text

Non-Half Hourly (NHH) Notional Capacity

Amend paragraphs 3, 83 and 84 of Schedule 16 as follows:

3. In order to comply with this methodology statement when setting distribution Use of System Charges the DNO Party will populate and publish:
- (a) the CDCM model version ~~103-XX~~¹ as issued by the Panel on ~~1 April~~ ~~2015~~²; and
 - (b) the CDCM “Price Control Disaggregation” model version 3.0 as issued by the Panel on 1 April 2016.
83. For the tariffs listed below, LV costs are allocated to the fixed charge by estimating the proportion of LV network capacity used by these categories of users, and dividing the corresponding proportion of LV costs by the number of domestic and non-domestic MPANs: In calculating network capacity used by NHH tariffs the demand is adjusted by multiplying it by [the average HH agreed capacity, divided by the average HH maximum demand from the HH tariffs at the same voltage level].
- Domestic Unrestricted
 - Domestic Two Rate
 - Small Non-Domestic Unrestricted
 - Small Non-Domestic Two Rate
 - LV Network Domestic
 - LV Network Non-Domestic Non-CT.
84. For the tariffs listed below, the relevant unit costs in p/kVA/day are converted to a fixed charge by multiplying them by the estimated maximum load per user of the user category (obtained from the volume forecast and load factor data) divided by the power factor in the network model: This value is then multiplied by [the average HH agreed capacity, divided by the average HH maximum demand from a HH tariff at the

[same voltage level](#)].

- LV Medium Non-Domestic
- LV Sub Medium Non-Domestic
- HV Medium Non-Domestic.

Amend paragraph 1.1 of Schedule 20 as follows:

- 1.1 The “Annual Review Pack” or “ARP” is a document to be completed by each DNO Party giving indicative (when first published in accordance with Clause 35B) and final (when updated in accordance with Clause 35B) Use of System Charges to apply pursuant to the Charging Methodology set out in Schedule 16 (the “CDCM”). The pack shall contain detail of historical and forecast CDCM inputs, and a forecast of use of system tariffs for the next 5 years, in accordance with Paragraph 2. The template to be used for the pack shall be ARP model version ~~102~~[\[XX\]](#)³ as issued by the Panel on ~~01 April 2015~~[\[XX\]](#)⁴.
