Company	Confidential / Anonymous	4. Do you consider that the proposal better facilitates the DCUSA/SPAA objectives? Please give supporting reasons.	TEG comments
British Gas	Non-confidential	We think that an argument could also be made that the DCUSA objective 2 “The facilitation of effective competition in the generation and supply of electricity and (so far as is consistent therewith) the promotion of such competition in the sale, distribution and purchase of electricity” could also be better facilitated by this proposal. It is a supply licence condition that all suppliers with registered customers should submit data to the TRAS. Suppliers incur cost in preparing and submitting data to the TRAS. If some suppliers are avoiding these costs this could distort the market in favour of those suppliers who have not invested in system changes to enable data to be submitted.	The TEG agreed to expand the CP to cover DCUSA Objective 2.
Supplier 1	Anonymous	Yes. We believe that this CP promotes efficiency in the implementation and administration of the supply administration arrangements.	Noted.
Scottish Power	Non-confidential	Yes – agree with justification listed in the CP.	Noted.
