**Amend Schedule 22, Paragraphs 1.43 – 1.44A as follows:**

**National-Grid Electricity Transmission System Operator (NETSONGET) Charges**

- 1.43 We have an obligation under the CUSC to discuss certain requests for connection or changes in connection with the NETSONGET. Such requests are typically for large electrical demand or generation projects. Under certain circumstances, as determined by the NETSONGET, they may apply charges to assess the potential impact on the GB Transmission System of a request or the combined effect of a number of requests and these will be included in the Connection Charge, or through a separate mechanism agreed between you and us.
- 1.44 Subsequent to such assessment, the NETSONGET may also require works to be undertaken on the GB Transmission System as a condition of the connection being permitted. In the event of the NETSONGET applying charges for these works, we will reflect these charges in our charges to you.
- 1.44A Should GB Transmission System works be required, the NETSONGET may apply a cancellation charge in the event that your project is cancelled or the capacity of your project reduces. The NETSONGET also calculates a secured amount in respect of this cancellation charge (being a percentage of the cancellation charge, which reduces at certain trigger points). We may ask you for security in respect of this cancellation charge, but we will not ask you for more than the secured amount calculated by the NETSONGET.

**Amend the following definition in Schedule 22, Section 2 as follows:**

<u>NETSONGET</u>	<u>means the national electricity transmission system operator for Great Britain from time to time</u> <del>National Grid Electricity Transmission ple</del>
