

DCP 251 & 252 Qualifying Network Operator Tariffs Definition:

[QNO tariffs] apply in cases where the DNO provides use of system to:

a) an IDNO Party, for the purpose of distributing electricity to any premises or distribution systems,

or

b) a DNO Party, for the purpose of distributing electricity to premises or distribution systems outside that DNO Party's Distribution Services Area, or

c) any other person, for the purpose of distributing electricity over a distribution system authorised by exemption under the Act to premises where the electricity supplied to this premises is supplied through a Metering Point and where a Distribution Business provides the relevant Data Services in respect of that Metering Point in order to facilitate competition in supply.
