Smart Meter Installs

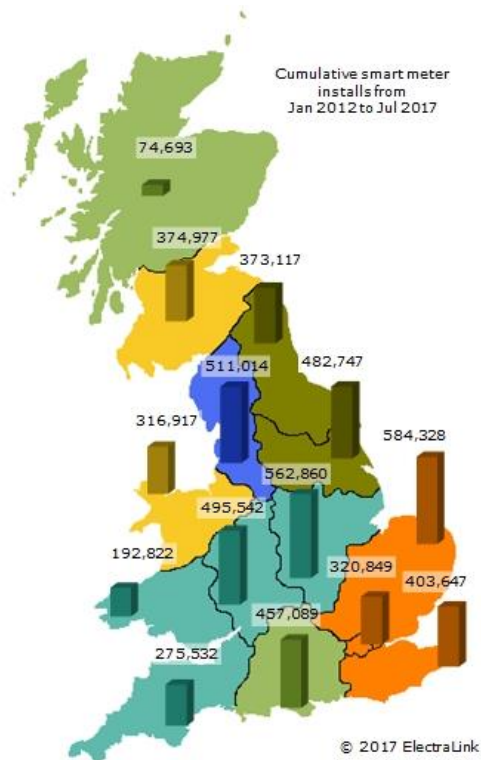

This paper provides an overview of the cumulative smart meter installs from July 2017 and the costs associated with receiving a tailored report.

1 Overview

- 1.1 ElectraLink currently publishes an extract of smart meter installs on its website and is able to provide a comprehensive market-wide dataset covering meter installations, DNO and site visit issues undertaken by all Suppliers for electricity installs going back to April 2012. This data was reviewed by the SMICoP Governance Board, whereby it was noted that a report on the Service Terminations Category Codes may be of interest to the Interventions Working Group.
- 1.2 The graph below shows the smart meter installs for July 2017, which indicates that **233,299** SMETS meter were installed:

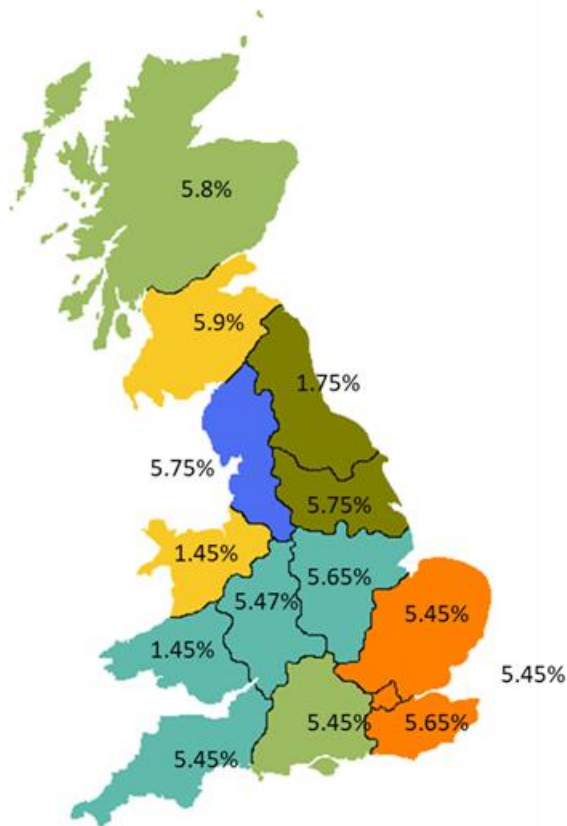

- 1.3 The graph below shows the cumulative smart meter installs from January 2012 to July 2017, which indicates that **5,426,134** SMETS meters have been installed:

2 Tailored Reporting

- 2.1 A graph could be created that would highlight the number of S1 and S2 meters per GSP Group and confirm the percentage of meters this represents against the total number of Meter Point Administration Numbers (MPANs). For illustrative purposes, the below graph has been generated based on dummy data, which would be accompanied by the backing data used to develop the graph as shown above. Please note that the backing data provided is for the smart meters installations in May 2017.

GSP_GROUP_ID	S1	S2A	Rollout %
_A	16,374		0.44%
_B	17,681	1	0.65%
_C	7,395		0.31%
_D	14,353		0.95%
_E	13,583		0.54%
_F	10,374		0.65%
_G	15,568		0.65%
_H	14,617		0.47%
_J	9,232		0.40%
_K	8,370		0.74%
_L	7,101		0.44%
_M	13,693		0.60%
_N	18,680		0.86%
_P	3,317		0.39%

2.2 This report, including the graph and backing data, could be generated on a monthly basis for £415 per report for a one-year period, which equates to £5,000.

3 Recommendations

3.1 The IWG is invited to:

- **NOTE** the contents of this paper; and
- **AGREE** whether to progress with receiving electricity smart meter install reports.
