### Changes going for Impact Assessment:

10 WORKING DAYS: None

30 WORKING DAYS: None

MDB will next meet on 26<sup>th</sup> January 2017.

### 3. IREG Update

IREG met on 11th January 2017 and discussed the following:

#### **MIF 197 Mandating the secure sending of data via the DTC**

IREG further reviewed the drafting of a number of change proposals associated to ensuring data is sent securely across the DTN. These included:

MAP09 (Standard Address Format) where the group felt that the sending of a new Data Flow, similar in kind to the D0131, could be used to advise the Distribution Businesses of the existing address information and the proposed new information, which they could then accept or reject. A draft change proposal would be required for MAP09, a DTC change for the new Data Flow and Data Item/s. Some minor amendments were agreed by the group before proceeding to a formal change proposal.

IREG also further considered some agreed drafting for MAP12 (Agreed Procedure for Customer Requested and Co-operative Objections). Some further refinements were agreed by the group before moving to a formal change proposal.

#### **MIF 198 Procedure for the Assignment of Debt in Relation to Prepayment Metering**

IREG reviewed the latest updated drafting of the MAP and the associated documents, including updates to the Data Flows (D306,307,308,309), updates to the Data Item definitions, the Data Flow notes and the Change Proposals drafted.

IREG agreed a number of minor amendments in order for the package of changes can be shared with SPAA and look to taking the formal changes forward.

IREG will next meet on 08<sup>th</sup> February 2017.
