Smart Energy Code (SEC) Update

1. Purpose

This paper intends to inform the DCUSA Panel, and Parties, of the activities occurring in relation to the SEC. The SEC Panel is due to meet on 10th February 2017. A verbal update on relevant discussions held at this SEC Panel meeting shall be provided at the 15th February 2017 DCUSA Panel meeting.

2. Code Updates

2.1 SEC Version 5.3

SEC version 5.3 was designated on 26th January 2017, introducing amendments consulted on in September 2016.

The designated changes to SEC Section N enable the government to direct the DCC to undertake further analysis on Smart Metering Equipment Technical Specifications 1 (SMETS1) meter enrolment with DCC systems in relation to the Initial Enrolment and Adoption Feasibility Report (IEPFR), should it be necessary.

The amendments also require Supplier Parties to comply with any reasonable requests for information made by the DCC to support its analysis. Non-provision of the information would result in the exclusion of that Supplier's SMETS1 meters from the DCC's further analysis, unless government directs otherwise.

The changes to the SEC introduce the new Section to the SEC, 'Section N4A: Further Initial Enrolment Analysis'. Other consequential changes have been made in SEC Section N.

More information on the latest designation can be found on the latest news article on the [SEC Website](#).

3. SEC Modifications Update

3.1 New Modification Proposals

There have been no new Modification Proposals submitted to SECAS since the January 2017 DCUSA Panel meeting.

3.2 Modification Proposals Approvals

On 26th January 2017, the Authority (BEIS) approved SECMP0016 'Consideration of "Maximum Credit" value in credit cover calculation'. This followed the Change Board vote for recommendation in December 2016.

SECMP0016 changes the SEC Credit Cover Requirement calculation so that it takes into account the credit value specified by an independent credit assessor. The proposed calculation introduces an Unsecured Credit Factor, in place of the current Credit Cover Factor, that is a proportion of a Party's Maximum Credit Value. The Unsecured Credit Factor is determined by the Party's Recognised Credit Rating or Credit Assessment Score.

The modification has an implementation date of 1st April 2017.

3.3 Modification Proposals in Consultation

On 9th January 2017, SECAS issued SECMP0021 'Increase the representation of the "Other SEC Party" category on the SSC and TABASC' for Working Group Consultation.

SECAS also issued SECMP0026 'Changes to the Security Sub-Committee Nomination Process' for Modification Report Consultation on 18th January 2017. Consultation closes on 8th February 2017.

3.4 Open Modification Proposals

Section 3 - Modification Proposal Progress in the below attached February 2017 Modification Status Report summarises the progress of all open Modification Proposals. For further details, please refer to the [Modifications Register](#).

4. Next Meeting

The next SEC Panel meeting is scheduled for Friday, 10th February 2017.

Kayla Reinhart

SECAS Team

8th February 2017

Modification Status Report

February 2017

FOR INFORMATION

1. Summary

This report provides a monthly update on the status and progress of SEC Modification Proposals, highlighting key information and decisions made. This report covers the period between the January 2017 and February 2017 SEC Panel meetings. Further information can be found in the Modifications Register and/or on the Modification Proposal [webpages](#).

1.1. Status of Open Modification Proposals

Modification Proposals in refinement, 18

1.2. New Modification Proposals

No new modifications were raised this month.

1.3. Approvals and Rejections

One Authority determination was made last month:

- **SECMP0016 "Consideration of "Maximum Credit" value in credit cover calculation"** was approved by the Authority on 26th January. The DCC are currently updating their systems ahead of a 1st April 2017 implementation.

2. Highlights from last month

SECMP0009 “Centralised Firmware Library”: SECAS met with Industry Parties to help develop a Process Description presenting background and options of how a Centralised Firmware Library may be obtained. SECAS has circulated the document to the Proposer ahead of circulating it to the Working Group (WG) before the next meeting.

SECMP0021 “Increase Other SEC Party representation for TABASC and SSC”: The WG consultation closed on the 30th January. The next WG meeting is taking place on 6th February 2017, where the consultation responses and supplementary feedback from the Security Sub-Committee (SSC) and Technical Architecture and Business Architecture Sub-Committee will be discussed. The WG will also revisit the benefits and drawbacks and initial views against the SEC Objectives.

SECMP0024 “Enduring Approach to Communication Hub Firmware Management”: The first WG meeting took place on 9th January 2017. Following the meeting, SECAS agreed to produce strawman-solutions for the approaches discussed and to circulate these to WG Members and Energy UK for further consideration.

SECMP0025 “Electricity Network Party Access to Load Switching Information”: The first WG meeting took place on 26th January 2017. The WG agreed the principles behind the modification. SECAS has drafted the business requirements and sent these to the WG for review.

Modification Progression Timetable review - A number of progression timetables for Modifications within the Refinement Process have been reviewed. The Panel will be considering these revisions at the February Panel meeting. Please refer to SECP_41_1002_09 – Modification Progression timetable review for further details.

3. Modification Proposal Progress

This table summarises the progress of all open Modification Proposals. For further details, please refer to the [Modifications Register](#).¹

¹ These dates may change following the Panel’s consideration of new timelines contained in the Modification Progression Timetable review.

4. Release Contents

This section provides a summary of future releases and highlights modifications that are targeted for, or approved for, a scheduled release date.

Stand Alone Implementations

Mod Ref	Status	Potential Impacts	
		Docs	Systems
SECMP0026	Changes to Security Sub-Committee Nomination Process.		
Following a February 2017 Change Board Vote, if SECMP0026 is implemented in March 2017 , SECMP0026 would only impact the SEC.			

Mod Ref	Status	Potential Impacts	
		Docs	Systems
SECMP0016	Consideration of “maximum credit” value in credit cover calculations.		
Following approval by the Authority, SECMP0016 will be implemented in April 2017 . SECMP0016 impacts SEC and internal DCC systems.			

Mod Ref	Status	Potential Impacts	
		Docs	Systems
SECMP0021	Increase the representation of the “Other SEC Party” category on the SSC and TABASC.		
Following an approval at the April 2017 Change Board Vote, SECMP0021 would be implemented in June 2017 . SECMP0021 would only impact the SEC.			

June 2017 Release (29th June 2017)

Mod Ref	Status	Potential Impacts	
		Docs	Systems
The June 2017 Release will not contain modifications with a DCC Systems or Device Impact.			
This is in line with the Panel consideration of the June 2017 Release content undertaken at the September 2016 and October 2016 Panel meetings.			

November 2017 Release (2nd November 2017)

Mod Ref	Status	Potential Impacts	
		Docs	Systems
The November 2017 Release will not contain modifications with a DCC Systems or Device Impact. This is in line with the Panel consideration of the November 2017 Release content undertaken at the September 2016 and October 2016 Panel meetings.			

BEIS-directed changes

CR195: Self Service Interface Functionality (Section H8.16(c)) (if this is not resolved before the November 2017 Release)

CR193: Use of User identifiers (EUI-64 identifiers) variation resolution

DCC internal changes

CR205: Anomaly Detection SMETS Objects Limits

CR183: Recovery Procedure Changes

February 2018 Release (22nd February 2018)

Mod Ref	Status	Potential Impacts	
		Docs	Systems
<u>BEIS-directed changes</u>			
CR184: Dual Band Communications Hubs			
CR194: Designation of new Technical Specifications, GBCS and other SEC changes (Technical Specification Group (TSG)2)			

June 2018 Release (28th June 2018)

Modifications		Status	Potential Impacts	
Ref	Name		Docs	Systems
0004	Add MSN data item in SMI	Following an Authority approval in May, June 2018 would be the earliest point that these modifications could be implemented if approved following completion of the Modification Process.	SMETS2, GBCS, DUIS	DCC
0008	Provide a DCC Alert for Quarantined SRs		DUIS, TADP	DCC
0011	Add MAP ID data item to the SMI		DUIS	DCC

November 2018 Release (29th November 2018)

Modifications		Status	Potential Impacts	
Ref	Name		Docs	Systems
0002	Add New Command to Reset Debt Registers	In light of the Panel's consideration of the content of the first few enduring releases, this may now be the earliest point that the modifications listed here may be implemented if approved following completion of the Modification Process.	SMETS2, GBCS, DUIS, MMC	DCC
0005	Add Tariff and Register Labels in SMETS2 Devices		SMETS2, GBCS, DUIS	DCC
0006	Specify number of digits for device displays		SMETS2, GBCS, CHTS,	SMS
0007	Enable OTA firmware updates to		SMETS2, GBCS, CHTS,	DCC

Modifications		Status	Potential Impacts	
Ref	Name		Docs	Systems
	mandated HAN devices			
0009	Centralised Firmware Library		SEC	TBC
0010	Introduce triage arrangements for Communications Hubs		CHIMSM, CHTS	DCC
0012	Add channel selection for Shared HAN solutions		SMETS2, GBCS, DUIS, CHTS, MMC, DUGIS	TBC
0013	Introduce triage arrangements for SMETS2 devices (e.g. smart meters)		DUIS	DCC, SMS
0015	GPF timestamp for reading instantaneous Gas values		SMETS2, GBCS,	DCC
0018	Standardise ENO Configuration settings		GBCS	
0019	Standardise ALCS/HCALCS description labels		DUIS	DCC, DCC Users
0023	Correct Units of Measure for Uncontrolled Gas Flow Rate		SEC, DUIS, SMETS2	DCC, Users
0024	Enduring Approach to Communication Hub Firmware Management		SEC, DUIS,	DCC, SMS
0025	Electricity Network Party Access to Load Switching Information		SEC, DUIS, SMETS2	DCC, Users
0027	Amending Service Request Forecasting		SEC	DCC, Users
0028	Prioritising Service Requests		SEC, DUIS,	DCC, Users
0029	Business Continuity and Disaster Recovery Testing Amendments		SEC	

Modifications		Status	Potential Impacts	
Ref	Name		Docs	Systems
0030	Demand Management of DCC Systems		SEC, DUIS,	DCC, Users
