

Email received from Northern PowerGrid 2 May 2013

Please find attached an updated 'Appendix C - Summary for both Feb 2012 and Feb 2013' spreadsheet from Northern Powergrid in respect to the DCP161 request for information.

Whilst we agree with the 'Exceeded capacity charge (p/kVA/day)' values, populated by a member of the working group, after customer contributions have been removed from the CDCM models, we felt that changes to the *whole* tariff should be reflected in the analysis to ensure that a true before and after picture is provided.

Consequently, we have amended the '3701r' worksheet in the 'Appendix C - Summary for both Feb 2012 and Feb 2013' spreadsheet to include an extra row which shows the full impact on each of the four tariffs listed when the customer contributions have been removed from input 1060 in the relevant CDCM models for both Northern Powergrid (Northeast) Ltd and Northern Powergrid (Yorkshire) Plc.
