1. Administration

- 1.1 The Chair welcomed the members to the meeting.
- 1.2 The Working Group reviewed the “Competition Law Guidance”. All Working Group members agreed to be bound by the Competition Law Guidance for the duration of the meeting.
- 1.3 The Terms of Reference for the meeting were reviewed and the Working Group agreed that these were a fair and accurate representation of the Working Group’s objectives and agreed to be bound by them for the duration of the Working Group.

2. Purpose of the Meeting

- 2.1 The Chair set out that the purpose of the meeting is to review and analyse the Change Proposal (CP), review the proposed legal text and agree next steps for the CP.

3. Overview and Review of the DCP 343 Change Proposal

- 3.1 The Proposer provided an overview of the content of DCP 343 which acts as Attachment 1.
- 3.2 Since 2016, DNOs have been required to annually procure a Nominated Calculation Agent (NCA) for the calculation of the ‘HV split’ and ‘LV mains split’ percentages. The ‘LV mains split’ value used is specific to each DNO licensee. The NCA typically charges for its services, and the submissions to the NCA are required from all DNOs and all LDNOs and therefore, is inefficient. The DNOs have all the information available to calculate the ‘LV mains split’ themselves and so there is no need to use an NCA for this calculation.
- 3.3 The CP sets out that the DNOs will use the data from billing information sent via the D0314 flow on 31 March for each financial year. There may be a need for this data to be verified by the IDNOs, whether formally, informally or not at all, however, this can be a question for Parties during the consultation phase.
- 3.4 The Chair questioned what had changed since the implementation of DCP240 ‘Nominated Calculation Agent to calculate the LV mains split’¹ which was implemented on 01 April 2016. It was confirmed that DCP 240 introduced the LV mains split calculation and at that time, it was thought that there was a need for the NCA to complete it.

4. Review of DCP 343 Draft Legal Text

- 4.1 The Working Group reviewed the proposed legal text which can be found as Attachment 2.
- 4.2 The Proposer noted that the proposed legal text removes the requirement for IDNOs to provide data to the NCA for the LV mains split calculation and updates an incorrect Schedule reference that was missed when the PCDMs were merged into Schedule 29.
- 4.3 The legal text also sets out that the DNOs will use the billing data for the calculation of the LV mains split.
- 4.4 One Working Group member questioned whether the DNOs will use paragraph 33 of Schedule 29 to calculate the LV mains split. The Proposer confirmed that using a, b and c of paragraph 33 sets out the steps needed for the DNO to complete the calculation.

5. DCP 343 Consultation Document

- 5.1 The Working Group discussed specific areas which they would like to include in the draft consultation for the CP.
- 5.2 The Working Group agreed that a specific question should be asked regarding the customer counts being taken from the D0314 billing data and whether Parties agree that this would be an appropriate source of the information. It was also suggested that the consultation should discuss whether the IDNOs would need to check the data, formally, informally or not at all.
- 5.3 One Working Group member also suggested that it would be beneficial to include any cost saving information.
