CP Title	NTC DEH gap
Impacted parties	DNOs, IDNOs
Impacted Clause(s)	Schedule 2
Part 1 / Part 2 Matter	[See Guidance Note 2] Part 1
Provide your rationale why you consider this change is a Part 1 or Part 2 Matter	Impact on customers
Related Change Proposals	[See Guidance Note 3]
Change Proposal Intent	
<p>To amend the NTC so that they cater for DNOs' connections to non-metered DEH networks.</p> <p>There should be no impact from this change on the applicability of the NTC to boundary metered DEHs or on the contractual terms suppliers put in place by virtue of Schedule 2A of DCUSA.</p>	
Business Justification and Market Benefits	
<p>Due to the wording in the NTC, a gap exists insofar as a class of connectees is not covered by them. These are non-metered DEHs.</p> <p>See Appendix 1</p> <p>This change seeks to put in place a set of terms that is a minimal change from existing terms that apply to other customers, in order that these non-metered DEHs are covered by the NTC in the</p>	

absence of a bi-lateral connection agreement.

There should be no impact from this DCP on boundary metered DEH connections or their connection terms.

There should be no impact from this DCP on the terms that suppliers put in their contracts that refer to the NTC.

## PART B – MANDATORY FOR NON CHARGING METHODOLOGIES CHANGE PROPOSALS

## DCUSA Objectives

### General Objectives:

Please tick the relevant boxes. [See Guidance Note 9]

- 1 The development, maintenance and operation by the DNO Parties and IDNO Parties of efficient, co-ordinated, and economical Distribution Networks
- 2 The facilitation of effective competition in the generation and supply of electricity and (so far as is consistent therewith) the promotion of such competition in the sale, distribution and purchase of electricity
- 3 The efficient discharge by the DNO Parties and IDNO Parties of obligations imposed upon them in their Distribution Licences
- 4 The promotion of efficiency in the implementation and administration of this Agreement
- 5 Compliance with the Regulation on Cross-Border Exchange in Electricity and any relevant legally binding decisions of the European Commission and/or the Agency for the Co-operation of Energy Regulators.

## Detailed rationale for better facilitation of the DCUSA Objectives identified above

[See Guidance Note 10]

With estimated private networks being in the order of one hundred thousand or more it is not practical administratively to conduct efficient management of licensed distributor to licence exempt distributor arrangements without these changes. It would not be possible to deliver a robust transparent and codified approach to co-ordinating in an economical way the management of the sum of those distribution networks.

## PART C – MANDATORY FOR CHARGING METHODOLOGIES CHANGE PROPOSALS

## DCUSA Charging Objectives

Please tick the relevant boxes. [See Guidance Note 11]

### Charging Objectives:

- 1 that compliance by each DNO Party with the Charging Methodologies facilitates the discharge by the DNO Party of the obligations imposed on it under the Act and by its Distribution Licence
- 2 that compliance by each DNO Party with the Charging Methodologies facilitates competition in the generation and supply of electricity and will not restrict, distort, or prevent competition in the transmission or distribution of electricity or in participation in the operation of an Interconnector (as defined in the Distribution Licences)

- 3 that compliance by each DNO Party with the Charging Methodologies results in charges which, so far as is reasonably practicable after taking account of implementation costs, reflect the costs incurred, or reasonably expected to be incurred, by the DNO Party in its Distribution Business
- 4 that, so far as is consistent with Clauses 3.2.1 to 3.2.3, the Charging Methodologies, so far as is reasonably practicable, properly take account of developments in each DNO Party's Distribution Business
- 5 that compliance by each DNO Party with the Charging Methodologies facilitates compliance with the Regulation on Cross-Border Exchange in Electricity and any relevant legally binding decisions of the European Commission and/or the Agency for the Co-operation of Energy Regulators.

General Objectives:

- 1 The development, maintenance and operation by the DNO Parties and IDNO Parties of efficient, co-ordinated, and economical Distribution Networks
- 2 The facilitation of effective competition in the generation and supply of electricity and (so far as is consistent therewith) the promotion of such competition in the sale, distribution and purchase of electricity
- 3 The efficient discharge by the DNO Parties and IDNO Parties of obligations imposed upon them in their Distribution Licences
- 4 The promotion of efficiency in the implementation and administration of this Agreement
- 5 Compliance with the Regulation on Cross-Border Exchange in Electricity and any relevant legally binding decisions of the European Commission and/or the Agency for the Co-operation of Energy Regulators.
