

Comparison template: 2a. Private Network with Competition in supply

Private network with partial competition in supply.

Private Network with Competition in Supply

Description and notes:

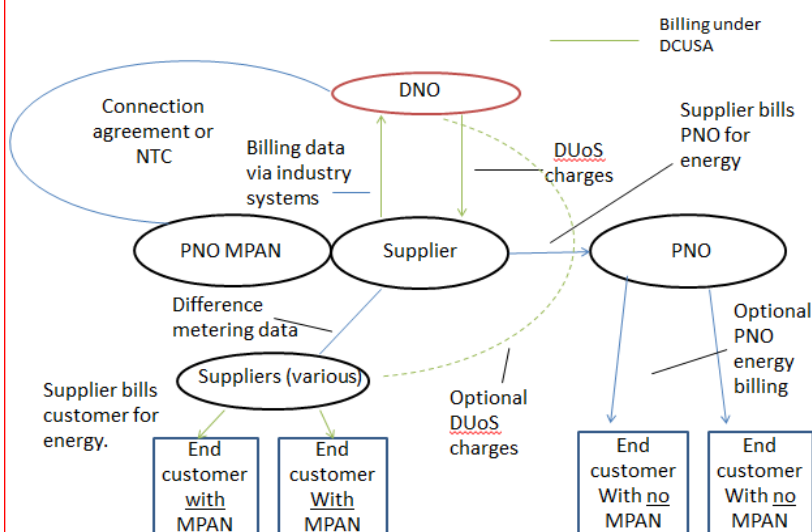

Assets established by PNO to connect end users.

Boundary meter and DNO MPAN at the boundary.

Some end users have DNO MPANs. Some end users have private meters.

DNO provides registration services to the suppliers of the end customer.

Private network with competition in supply

Contractual relationships for DUoS:

DNO charging at the site boundary is covered by DCUSA.

PNO has the option of charging DUoS to suppliers registered to end user MPANs.

If PNO opts to charge DUoS it needs an Ofgem approved methodology.

Summary of features and services provided.

DNO

Provides a connection to the PNO, receives meter readings from industry systems to support DUoS billing, Provides MPANs and registration services to facilitate competition in supply.

IDNO

Not involved so not applicable.

Suppliers

Pays DUoS to DNO in respect of the boundary MPAN. May also need to pay DUoS to the PNO if it opts to charge DUoS.

Private Network Operator

Operates outside industry systems and does not provide registration services pursuant
