

Customer contributions under current connection charging policy

- 29 The DNO Party estimates the extent to which the assets at each network level used by each category of users would have been expected to be covered by customer contributions if they had been constructed under the charging year's connection charging policy.
- 30 The DNO Party groups users into categories, by network level of supply, for the purpose of making these estimates.
- 31 ~~In the case of generators, the proportions relate to the notional assets whose construction or expansion might be avoided due to the generator's offsetting of demand on the network, and takes the same values as for a demand user at the same network level of supply.~~ The information utilised will be an average of the last five complete years of reported data available at the time of setting charges.
