

## DCP 152 Consultation – Appendix A

The following table details the significant milestones since October 2008:

Date	Action
1 October 2008	Ofgem published proposals for a common distribution charging methodology based on LRIC for extra high voltage (EHV) users and a distribution reinforcement model (DRM) for high voltage (HV) and low voltage (LV) users. <sup>1</sup>
20 March 2009	Ofgem announced that it would publish new proposals involving a choice between the LRIC and FCP methods for EHV users. <sup>2</sup>
1 July 2009	Licence conditions creating obligations on DNOs to develop and implement the common distribution charging methodology (CDCM), based on the HV/LV part of the October 2008 proposals, came into force.
31 July 2009	Ofgem proposed principles for charging EHV users using the FCP/LRIC approaches and a set of licence conditions to mandate their development and implementation. There was no objection from DNOs to these proposals. <sup>3</sup>
28 August 2009	DNOs published proposals for the CDCM. <sup>4</sup> Ofgem accepted these proposals after relevant conditions had been met by DNOs in December 2009. The CDCM came into force on 1 April 2010.
1 October 2009	Licence conditions creating obligations on DNOs to develop and implement the EHV distribution charging methodologies (EDCM), based on FCP or LRIC as specified in the 31 July 2009 document, came into force. These conditions required DNOs to come forward with proposals for the EDCM by 1 September 2010 for implementation by 1 April 2011.
23 April 2010	DNOs published a consultation on options for the allocation of customers between the EDCM and CDCM methodologies (the EDCM/CDCM boundary). Responses were received from all DNOs and from three other stakeholders. We published a summary of responses on 26 May 2010, available from <a href="http://2010.energynetworks.org/structure-of-charges-edcm/">http://2010.energynetworks.org/structure-of-charges-edcm/</a> .
15 June 2010	Ofgem issued a consultation document on the boundary between the EDCM/CDCM which seeks industry views on the options for defining the boundary to be used to determine whether customers should be subject to the EDCM or the CDCM. <sup>5</sup>
18 June 2010	DNOs published their first consultation on the proposed EDCM methodology.

<sup>2</sup> Ofgem (2009) Next steps in delivering the electricity distribution structure of charges project, ref 24/09

<sup>3</sup> Ofgem (2009) Delivering the electricity distribution structure of charges project: decision on extra high voltage charging and governance arrangements, ref 90/09

<sup>4</sup> Energy Networks Association (2009) Report on the draft common distribution charging methodology

<sup>5</sup> Ofgem – Modifications of the standard conditions of the electricity distribution licence granted or treated as granted under Section 6 (1) (c) of the Electricity Act 1989, dated 25 August 2010.

Date	Action
25 August 2010	Ofgem modified the distribution licence to change the EDCM/CDCM boundary.
27 August 2010	Ofgem published a letter to the DNOs derogating the DNOs from the requirement to submit the EDCM methodology and illustrative tariffs on 1 September 2010. The letter also set out several requirements for the DNOs to satisfy before submitting the EDCM. <sup>6</sup>
1 September 2010	DNOs published an EDCM information pack containing the results of the development work undertaken as on 1 September 2010.
30 September 2010	Ofgem published a letter to DNOs setting out their decision to revise the date by which DNOs are required to submit the EDCM methodology to 1 April 2011, for implementation by 1 April 2012.
21 December 2010	DNOs publish their second consultation on the proposed EDCM methodology.
11 February 2011	DNOs publish a mini-consultation on LDNO charging under the EDCM.
1 April 2011	DNOs' proposals for the EDCM were submitted by the ENA to Ofgem. This submission relates to the calculation of import and export charges for eligible customers. Documents relating to the submission and previous consultations are available to download from the website of the ENA. <sup>7</sup>
9 May 2011	Ofgem issue a consultation on UoS charges for pre-2005 DG <sup>8</sup> This consultation document seeks views specifically on Ofgem's proposals and rationale for determining whether refunds paid by DNOs to pre-2005 DGs should be funded through DNOs' price controls.
20 May 2011	Ofgem issue a consultation on the EDCM <sup>9</sup> . This consultation highlights areas that have changed since the DNOs' last consultation in December 2010. Provides Ofgem's thoughts on key aspects of the proposals and draws attention to a number of issues that may result in improvements to the methodology. They strongly encouraged stakeholders to engage with this consultation, both on the points issued and raised as well as the DNOs' proposals more broadly, to help inform our view ahead of their decision on the methodology.
11 August 2011	Following consideration of responses to the two consultations in May Ofgem issued an update on current thinking. Stating that they are considering allowing a time limited exemption for pre-2005 DG

<sup>6</sup> Ofgem letter to DNOs, dated 27 August 2010.

- Electricity distribution charging methodologies: DNOs' proposals for the higher voltages ref 67/11

Date	Action
	<p>from UoS charges. A time limited exemption would mean that, if certain criteria are satisfied, pre-2005 DG would not pay UoS charges until their exemption expires.</p> <p>In light of the need to resolve issues in relation to charging pre-2005 DG for UoS, Ofgem have decided that it will not be possible to introduce EDCM export charges for DG until April 2013 (or possibly later).<sup>10</sup></p>
6 September 2011	<p>Ofgem published its decision to approve these proposals for import charges only, subject to several conditions.<sup>11</sup></p> <p>The decision document details the rationale for the deferral of EDCM for export charges.</p>
12 October 2011	DCP 109 'Implementation of the EDCM' raised seeking to implement the EDCM for export (as approved by Ofgem) in the DCUSA.
21 October 2011	Ofgem publishes a consultation document setting out a number of options for the EDCM for export charges. <sup>12</sup>
28 November 2011	<p>Report submitted by the Energy Networks Association on behalf of the 14 regional electricity distribution licensees (DNOs) in Great Britain to accompany revised proposals for the EDCM. These revisions have been made, in part, to satisfy the two conditions that need to be met before 30 November 2011.<sup>13</sup></p> <ol style="list-style-type: none"> <li>1. The revisions that have been made to the EDCM methodology that was submitted on 1 April 2011 reflect: <ol style="list-style-type: none"> <li>a) Changes made by the DNOs to comply with conditions 1 and 2 of Ofgem's approval of the EDCM for demand only.</li> <li>b) Changes necessitated by Ofgem's decision to delay the implementation of the EDCM for export charges.</li> <li>c) Changes made to remove ambiguities or improve clarity in the original submission.</li> </ol> </li> </ol>
2 February 2012	Based on consultation responses, Ofgem publishes a document providing guidance to the DNOs on the issue of generation (export) charging. <sup>14</sup> The document also set a deadline of 1 June 2012 for the DNOs to submit their revised proposals for the EDCM for export charges.

<sup>13</sup> Conditions 1 and 2 of Ofgem's decision, see Ofgem (2011) Electricity distribution charging: decision on the methodology for higher voltage import charges, ref 116/11.

<sup>14</sup> Ofgem letter dated 2 February 2012. Available from: <http://www.ofgem.gov.uk/Networks/ElecDist/Policy/DistChrgs/Pages/DistChrgs.aspx>

Date	Action
20 March 2012	Ofgem issues a decision letter approving the implementation of DCP 109 'Implementation of the EDCM'.
1 April 2012	Import charges under the new EDCM come into force.
1 June 2012	The DNOs, through the Common Methodology Group (CMG), submit revised proposals for the EDCM for export charges to Ofgem.
8 August 2012	DCP 152 'Implementation of the combined EDCM for import and export charges' raised.
17 August 2012	Ofgem issued a consultation document seeking industry feedback on this revised methodology on 17 August 2012. The Ofgem consultation is scheduled to close on 2 October 2012 and is available <a href="#">here</a> .

The following table details the proposed milestones for the DCP 152 Working Group going forward:

Date	Action
5 October 2012	The DCP 152 Consultation closes
Mid-October 2012	Authority decision on the proposed EDCM export methodology expected
21 November 2012	DCP 152 Change Report presented to the DCUSA Panel
22 November 2012	Change Report issued for voting
31 December 2012 (TBC)	Authority consent on DCP 152 received
1 April 2013	Implementation date
