Electricity North West Limited	A	A	<p>ENW accept this change proposal since its scope was confined to DCP012 overwriting some of the definitions implemented by DCP009 and the inclusion of the necessary links to Section 2B.</p> <p>It must be noted that we will be raising a change proposal to cover off the further changes deemed necessary as a consequence of the DCP009 implementation, including the definitions contained within this change proposal which will need further refinement.</p> <p>We were initially a little concerned over the lack of governance associated with this change specifically the lack of industry consultation (especially in light of Ofgem's comments associated with DCP003 and the current review on Industry Codes) and the length of time to</p>

			<p>respond to this vote. After further consideration and since this was:</p> <ul style="list-style-type: none"> <li>▪ a relatively simple change,</li> <li>▪ did not attempt to fully impact DCP009, and</li> <li>▪ the further changes affecting this change proposal are minor in nature,</li> </ul> <p>we accept the Panel's decision to progress in this manner.</p>

E.ON UK	A	A	Although we understand there may be some consequential changes that may have been missed in this CP, we believe these could be captured by a later housekeeping change and that it is preferential for this change to progress.
EDF Energy Customers Plc	A	A	-
RWE Npower Group	A	A	We would suggest that the change process needs to be reviewed, in light of the requirement for this Urgent CP, in order to ensure that a more robust process is put in place to handle concurrent changes on the same area of Code in the future.
