Independent Power Networks Limited	ACCEPT	ACCEPT	IPNL supports this proposal as the proposal seeks to amend the unrealistic timescales set out in Clause 25.20 and align the process with BSCP515, thus providing clarity to the current conflicting requirements. IPNL also agrees that the Change Proposal will better facilitate DCUSA Objective 1 by ensuring that live MPANs remain registered thus giving Distributors knowledge of all connections to their systems and allowing them to maintain and operate the system efficiently.
