DNO PARTIES				
Western Power Distribution	Accept	Accept	<p>The promotion of efficiency in the implementation and administration of this Agreement and the arrangements under it.</p> <p>Wording update clarifies definition of what is expected when emergency operations are required.</p>	
Electricity North West	Accept	Accept	We agree with the change report in that this change will better facilitate General Objectives One and Three improving the efficiency of a current process while highlighting the safety element.	
Northern Powergrid	Accept	Accept	General Objectives one and three will be better facilitated as it is more efficient to allow a customer, who has the experience and knowledge, to de-energise the Customer Installation from the Connection Equipment in emergency situations without the prior agreement of the Company as long as this is	

			done safely and the Company is informed promptly afterwards.	
IDNO PARTIES				
BUUK Infrastructure	Accept	Accept	Alongside the working groups views it is felt that general objectives one and three are better achieved by this change as it provides a practical means for customers to de-energise their installation in emergency situations while ensuring that distributors are kept informed and thus able to act accordingly to meet their obligations.	
ESP Electricity Ltd	Accept	Accept	ESPE agree with the proposer that General Obj 1 and Obj 3 are better facilitated in that it is more efficient to allow a competent person to de-energise a site in an emergency situation without having to report to the distributor beforehand.
