

Q: When does the consultation period close?

A: The consultation period closes on Friday 17th April at close of play .

Q: Following the withdrawal of CMP332, is there going to be an impact on the implementation of the DCUSA CPs?

DCP 358 / DCP 360 'Ofgem Targeted Charging Review Implementation: Determination of Banding Boundaries / Allocation to Bands and Intervention'

A: Not at the moment. Industry are continuing to follow due process and develop the changes at the same timescales but this is always under review.

Q: Is there expected to be a delay in implementation due to the current pandemic?

A: The Working Group are trying to align as much as possible with the CUSC in terms of the banding. Working Group members will review the consultation responses and any unintended consequences e.g. the banding agent completing their work in October 2020. This was to cater for the earlier implementation of transmission charges which has now been pushed back. The DCUSA and CUSC Code Administrators will be discussing this in due course.
