

**DCP 399 – Revision to Embedded Capacity Register (ECR) to lower
threshold for entries from 1MW to 50kW**

Draft Legal Text

Amend the following definitions in Clause 1 (Definitions and Interpretation):

Embedded Capacity Register	means, for each DNO/IDNO Party, a register of site-specific data items for sites which are connected to the DNO/IDNO Party's Distribution System (or which are the subject of an accepted connection offer to be connected to the Distribution System), and which: (a) have an import capacity of <u>any size</u> 1 MW or more and are subject to a DSR Contract <u>of 50kW or more</u> ; and/or (b) have an export capacity of <u>any size and</u> <u>generation equipment with a registered capacity of 50kW</u> 1 MW or more. The required register format and data items are described in Schedule 31 (Embedded Capacity Register).
