

**DCP 397 'Modification of the Load Managed Area Notice Template'**

**Draft Legal Text**

**SCHEDULE 8 – DEMAND CONTROL**

**Amend Paragraph 5.3 of Schedule 8 as follows:**

5.3 A Load Managed Area Notice shall be effective when received or deemed to be received in accordance with Clause 59 and shall indicate:

- (a) the geographical area to which it applies by providing the LLFC and associated Load Switching Regimes for each postcode (or such other method as the Company and the Supplier agree, acting reasonably);
- (b) the time or times of day during which in the Company's opinion:
  - (i) changes to Load Switching Regimes in force at particular Metering Points introduced by Suppliers have increased the coincidence of Demand to such an extent that Security of Supply may be threatened; and
  - (ii) new applications of Load Switching Regimes to particular Metering Points introduced by Suppliers may reasonably be expected to increase the coincidence of Demand to such an extent that Security of Supply may be threatened;

(c) the former radio teleswitch (RTS) group code (where relevant);

(d) the existing SSC and replicating SSC for peak and off-peak, including the replicating SSC description aligned to Market Domain Data;

(e) the replicating time pattern regime (TPR) and time periods for peak and off-peak;

(f) the existing SSC and replicating SSC for combined switched loads, including the replicating SSC description aligned to Market Domain Data;

(g) the combined replicating TPR and time periods for switched loads;

(h) notes column to provide relevant additional information or descriptions of the Load Switching Regimes;

~~(e)~~(i) the date from which the notice is effective; and

~~(d)~~(j) that it shall continue in force until withdrawn in writing by the Company by serving a notice on all Suppliers and the Authority.

**Amend Paragraph 5.5 of Schedule 8 as follows:**

- 5.5 The Load Managed Area Notice referred to in Paragraph 5.3 shall be provided in Excel spreadsheet format using the template in Appendix A to this Schedule 8. The Secretariat shall make this template available on the Website, together with additional guidance notes.

**Amend Appendix A to Schedule 8 as follows:**

Load Managed Area Notice												
GSP Area (A_B_C_etc..)	Notice Effective From Date	Notice End Date (leave empty if ongoing)	Restriction Start Time (leave empty if 24hrs per day)	Restriction End Time (leave empty if 24hrs per day)	Restriction Start Month (leave empty if full year)	Restriction End Month (leave empty if full year)	Geographical area/Postcode Outcode	LLFC	<u>Former RTS Group Code (where relevant)</u>	Existing SSC	<u>Existing SSC for peak/off- peak</u>	<u>SSC for replicating peak/off- peak</u>

Load Managed Area Notice (columns continued)													
<u>SSC description for replicating peak/off-peak</u>	<u>TPR replicating peak</u>	<u>Time periods for peak</u>	<u>TPR replicating off-peak</u>	<u>Time periods for off-peak</u>	<u>Existing SSC for combined switched load(s)</u>	<u>Combined SSC for replicating switched load(s)</u>	<u>Combined SSC description for replicating switched load(s)</u>	<u>Combined TPR replicating switched load(s)</u>	<u>Combined TPR time periods (in MDD) - Max</u>	<u>Time periods for switched load 1 - space heating - Max</u>	<u>Time periods for switched load 2 - water heating - Max</u>	<u>Notes</u>	<u>Available SSCs</u>
