- 4.3 WM queried whether Customers can challenge an Exceeded Curtailment Limit (as well as the DNOs) - TM stated that DNOs would be seeking permission from Ofgem for a derogation (as opposed to amendment) and the Working Group agreed to amend the wording within the Consultation to the below:
  - *‘Following discussions around concerns with the methodology for calculating the Curtailment Limit, the Working Group agreed to include a provision which would allow the distributors to*

*be able to take this to Ofgem to seek permission for a derogation to not follow the methodology if the methodology results in a figure that the distributor considers to be inaccurate’.*

4.4 TM suggested additional wording to be included under a new sub-heading ‘Amendments to Schedule 22 – CCCM’ below and the Working Group agreed with the amendment:

- *‘Within Schedule 22 of the DCUSA (CCCM provisions cover the funding of control equipment for flexible connections and these provisions allow for the equipment that is connected at the customers premises to be funded by the customer but equipment that may be used more widely can either be shared or funded by the Network Operator.*
- *It is proposed that any on site equipment that is required to manage a curtailable connection is dealt within the same way and appropriate wording is proposed to be added to paragraphs 1.32A and 1.32B of the CCCM to apply this’.*
