

DCP 440

Consuming “de-energised” sites

Draft Legal Text

Schedule 16 COMMON DISTRIBUTION CHARGING METHODOLOGY

Amend schedule 16, clause 140 as follows:

139 There will be no charges applied to correctly de-energised HH MPANs/sites as determined by the de-energisation status in MPAS.

140 Where a site is incorrectly de-energised, i.e. **for any day** when actual **non-zero** metering advances are received **[and the MPAN has migrated under MHHS], charges will apply** and the DNO Parties should contact suppliers to ensure the status is corrected. If a site is found to be energised **and its status corrected**, charges will be back dated to the date of energisation-
