Nature of Issue	
<p>Unsure of how to differentiate between genuine MPANs changing from a NHH MC to a HH MC and those that are part of DCP414 initiative. Any invalid combinations will get corrected to a NHH LLFC as per industry guidelines, therefore, those that are part of DCP414 will also be part of those corrections. Will also need to understand if any MPANs have already changed for this initiative so that we can make retrospective changes.</p>	

Solution Overview – If Known	
<b>Solution Description</b>	Suppliers to provide – on a regular basis - a list of all MPANs that will be affected by the DCP414 implementation, so that the revised MPANs do not get corrected to a valid combination.
<b>Lead Time For Implementation</b>	To be implemented as soon as approved.
