

UK Power Networks

Supplier Meter Disposal Process

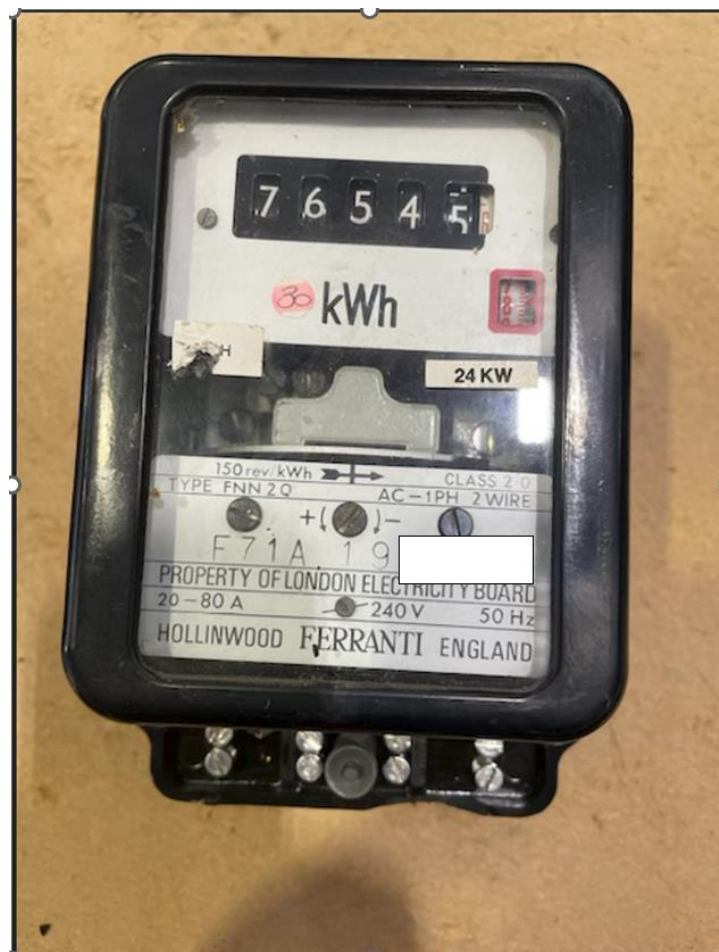

Bakerlite Case Meters

1971 Ferranti Meter
tested to have
Asbestos in RESIN -
Classified as Very
Low Risk

Redundant meter return
process to Childerditch
is currently suspended

Other manufacturers at
this time noted as
English Electric
Sangamo
Chamberlain & Hookham

Intelligence suggests
Bakerlite could have
asbestos in Resin makeup
> 1974

The meter age seen here (F71) is 1971

Post 1974 meters have
the potential for
Persistent Organic
Pollutants (POPS)

As a result of the
materials used in the
construction of
electricity meters.

All meters will need
to be consigned as
hazardous waste
under EWC code 20-
01-35*

(Waste contractor
requirements)

Waste Meters

To minimise handling and simplify the process UK Power Networks has nominated Sackers Limited to manage the disposal of these meters.

The meters do not need to be segregated.

To ensure asset tracking the Meter Operators will provide the serial numbers of the meters sent to our nominated waste contractor. Waste meters sent to our waste contractor must have a hazardous waste consignment note and the serial numbers.

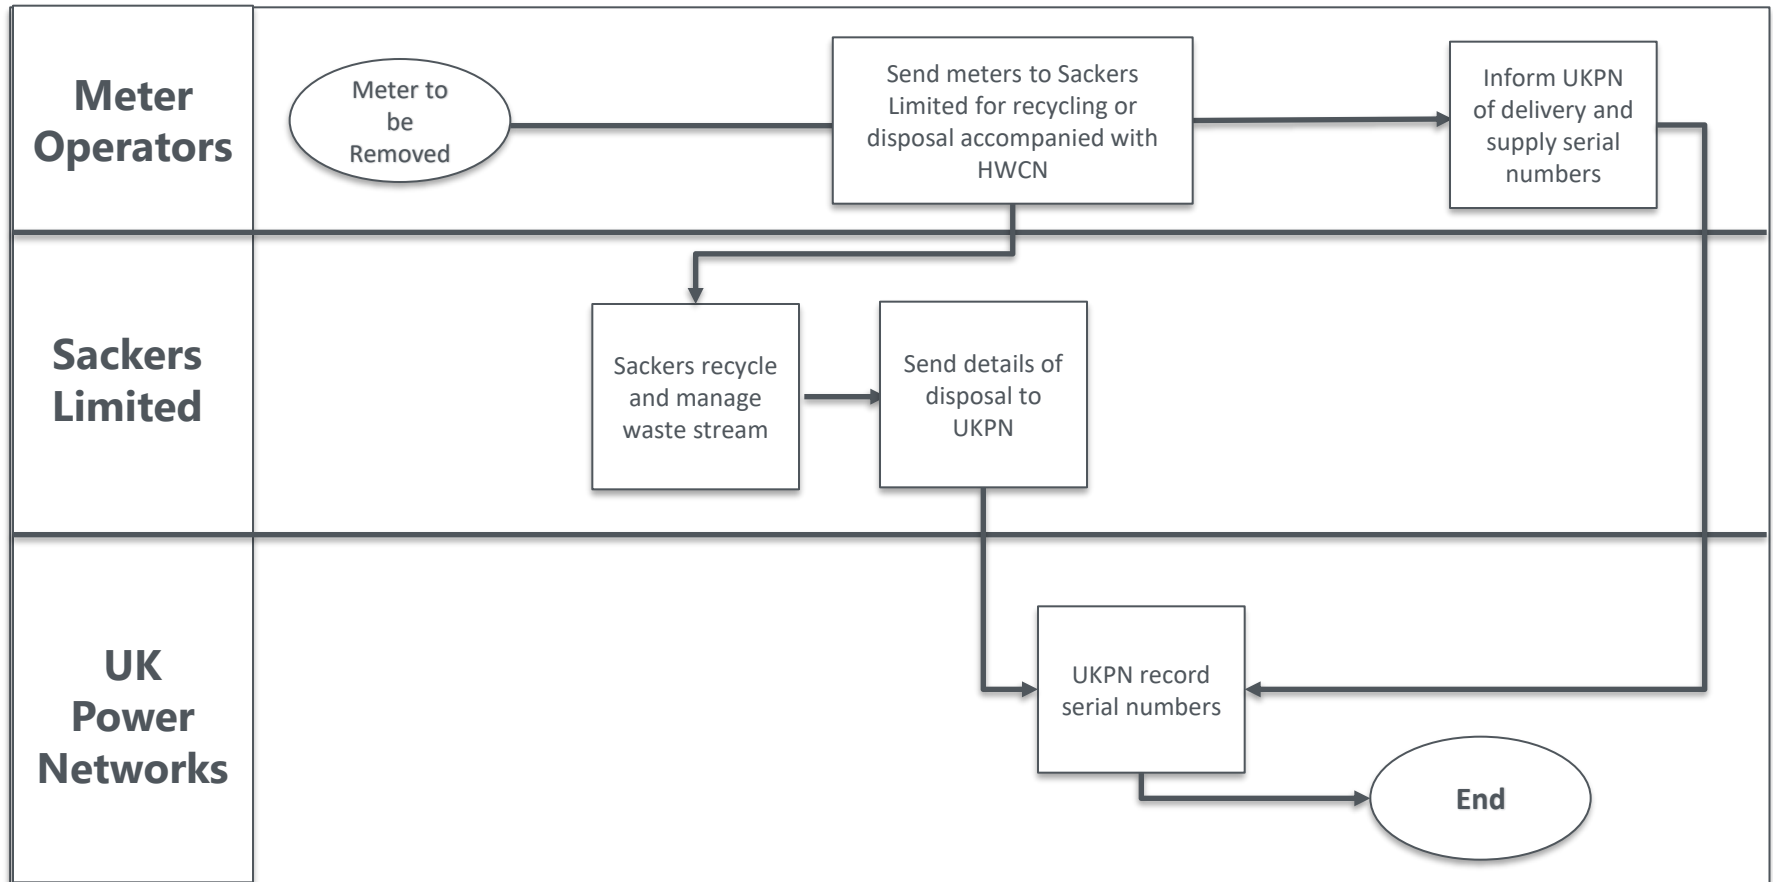

UK Power Networks will retain these serial numbers.

All meters returned to Sackers must be transported and stored in line with the Hazardous Waste Regulations.

[Check if your material is waste - GOV.UK](https://www.gov.uk)

Process for management of waste meters

1. Meters Removed
2. Meter Operators (holder of waste) deliver meters to Sackers Ltd with HWCN
3. Meter Operators inform UK Power Networks and supply serial numbers
4. Sackers confirm disposal and recycling

Nominated UK Power Networks Waste Contractor

UK Power Networks have nominated Sackers Limited as our waste management company for meters and all meters should be returned to them.
