			<p>Distribution Licence obligations and the promotion of efficiency in the implementation and administration of the DCUSA.</p> <p>The removal of a redundant and unused dataflow simplifies the DTC/EMDS, reducing unnecessary processing, maintenance activity, and the risk of erroneous or misinterpreted dataflows. This improves overall operational efficiency for market participants and code administrators, ensuring that only dataflows with a valid operational or regulatory purpose are retained.</p> <p>Additionally, the change supports a clearer and more streamlined data environment, reducing wasted effort across industry parties and helping ensure resources are focused on delivering against active obligations and processes, consistent with efficient licence compliance and code administration.</p>
