

DDDG Technical Subgroup - Centralised Tariff Dashboard

Meeting 13 – Phase 2

AGENDA

1. Open floor: question and feedback
2. Phase 2 update: IDNO Annex 1, Annex 2 & 6
3. AI use transparency
4. Pipeline: CIRP and API
5. ECC – impact on P2 and beyond.

TIMELINE

Phase 2	
Oct	Technical build
Nov	Sign-off
Dec	Launch
Jan	Phase 3

QUESTIONS AND FEEDBACK

	Name	Description	Agreed
1	Rates not visible w/o scrolling	The unite rate columns are pushed off screen resulting in the user having to scroll across to see the rates. **Proposed fix:** move the following to after the rates: 1) Charging Year, 2) Profile Class, 3) Open LLFC, 4) Closed LLFC.	Yes
2	Horizontal scroll bar too narrow	The scroll bar at the top and bottom of the table is too thin. Users struggle to grab it and scroll across to see the data.	Yes
3	GSP alignment with ID	GSP groups align one-to-one with (host) Distributor ID _A with 10, _B with 11, _C with 12……and so on.	Yes
4	Remove distributor ID from Area filter	The Area filter currently shows the distributor ID before the area name. With IDNO data added, this no longer holds as Independents have their own ID.	Yes
5	Host DNO filter shows parent DNO groups	Host DNO filter becomes the parent DNO groups (UKPN, SPN, SSEN, ENWL, NGED, NPG)	No
6	Filters work together	Each filter option shows every option which means users can pick combinations that return no results. **Proposed fix:** when a value is selected, the other filters update to show only options that hold data.	Yes

STAGING ENVIRONMENT REVIEW

Considerations

1. Dashboard still works with the addition of:
    - IDNO data
    - Annex 2

2. Does the download CSV file need changes
3. Time period tab changes / Assumptions tab
4. Anything else?

AI USAGE

Where it is being used

- **Coverage**: identifying published data
- **Collection:** downloading charging statements

  Review: checking for inconsistencies, errors etc

Why

- **Efficiency**: only way to deliver what is required at the scale and pace
- **Embedding:** embedded in the software development process

Commitment

- Disclose and human always in charge

PIPELINE

- CIRP
- API

ECC IMPACT ON PHASE 2 AND BEYOND

Background

- DCUSA and CUSC are merging to one code
- Current target: Q1 2028
- RECCo likely to be the new code manager
- RECCo's digitalisation strategy not yet produced
- Raised concerns about 'stranded assets' at DCUSA Strategy day

Our Approach

- Continue with Phase 2
- May impact Phase 3 once ECC direction is clearer
- Data ready to migrate

END
